MATERIAL: STEEL AND SYNTHETIC ROPE

### **INSPIRATION**

An evolution that celebrates elegance and craftsmanship: Darwin Evolution reinterprets the iconic collection through a language that combines formal lightness with material strength, enveloping spaces in an authentic warmth. Chair, armchair, lounge seating, and two-seater sofa develop through airy and balanced forms, where every curve and every weave expresses a strong and genuine dialogue between the steel structure and the rope backrests. The nautical braid, available in sophisticated tone-on-tone variations, integrates with coordinated stitching, creating a continuous and elegant visual rhythm. The meeting between woven rope and expanded metal sheet – a distinctive element of the Darwin collection – gives rise to an aesthetic that blends tradition and contemporaneity.

### **TECHNICAL FEATURES**

- Frame in steel tubing, diameter 22 mm.
- Seat in pre-galvanized expanded metal sheet for enhanced weather resistance.
- Backrest weaving entirely handmade using polypropylene rope, diameter 6 mm.
- Nylon feet.
- Chair and armchair stackable up to 8 units.
- Lounge chair and two-seater sofa stackable up to 4 units.
- The collection does not include a stool, as it does not meet the required technical and aesthetic standards.
