### INSPIRATION

L-UME is a collection that transforms light into atmosphere, shaping intimate and evocative spaces through a light and contemporary design language. A dynamic and adaptable lighting system, conceived to accompany both outdoor and indoor living, where each element interacts naturally and elegantly with its surroundings. The table lamps, available in different sizes, discreetly illuminate convivial moments, blending harmoniously into any setting. The lantern, on the other hand, stands out as an iconic element: free, nomadic, designed to be moved, hung, and experienced, it interprets light as a personal and ever-evolving presence. Enhanced by interchangeable covers in various sizes and colors, L-UME allows for endless combinations. In the version with an arched support, it amplifies its visual presence, becoming a strong and recognizable graphic element. In a poetic balance between function and imagination, light is filtered through delicate textures, generating luminous vibrations that warm and define the space.

### TECHNICAL FEATURES

- Two lighting units in plastic and aluminium (table lamps), available in two colors; one lantern in plastic, available in black and white.
- Expanded metal sheet covers available in three sizes.
- Steel support hook customizable to match cover colors.
- Pre-treatment, cataphoresis, and thermosetting powder coating finish.
- Removable decorative fabric handle allowing the lantern to be attached to parasols.
- Three color temperatures selectable by pressing the button multiple times.
- Dimmable light intensity by holding the button.
- Lighting duration at maximum intensity: 7.5 hours.
- Rechargeable batteries (charging base sold separately with USB-C cable); adapter not included.
- Charging time: 5 hours.
- The lantern recharges via a base by removing the top and inserting it into the charging unit.
- Approved for sale in the USA.
- IP65 protection rating.
- Battery replaceable by specialized personnel.
- Charging base, battery, and handle available as spare parts.
