INSPIRATION

A discreet icon capable of naturally transcending time. Star evolves by introducing a new high-back lounge model, expanding its language toward more generous and comfortable proportions, without renouncing its visual lightness. Color and versatility define its expressive identity, making it a cross-functional collection designed to accompany outdoor moments between living and dining. With a complete proposal that includes seating, tables, lounge pieces, and sofas, Star combines solidity and durability with an essential aesthetic, capable of adapting naturally to different contexts.

TECHNICAL FEATURES

- Frame in steel tubing, diameter 25 mm, thickness 1.5 mm, and hot-dip galvanized sheet metal for improved weather resistance. No aluminium version available for technical reasons.
- Stack protection spacers.
- Nylon feet with high abrasion resistance.
- Pre-treatment, cathaphoresis, and thermosetting powder coating finish.
- Stackable up to 8 units.
- Two cushions: seat and backrest. Back cushion fixed with Velcro on the final slat, also usable for the lounge version.
- Seat angle different from the low-back lounge version, encouraging greater relaxation.
