INSPIRATION

The Tami living collection is renewed with a contemporary “gesture” born from the encounter between design heritage and a modern vision in the stylistic signature of its designer. A reinterpretation that recalls the timeless elegance of 1950s outdoor furniture, translated into an essential, refined, and fully contemporary language. Tami is a modular and versatile collection designed to offer maximum design freedom. Each element can be configured in multiple ways, giving life to dynamic and highly personalized compositions. The new aluminium structure introduces a solid and elegant material dialogue, while generous proportions and welcoming cushions define wide, harmonious spaces dedicated to comfort. Large, structured cushions are enriched with contrasting piping details, adding a strong decorative note with significant visual and chromatic impact.

TECHNICAL FEATURES

- Metal platform made of aluminium profiles, die-cast joints, and extruded aluminium legs.
- Platform surface in hot-dip galvanized iron sheet, press-bent and cataphoresis treated.
- High-precision welding (TIG) and sanding of backrest and armrest frames to further enhance aesthetic quality.
- Backrests and armrests made of aluminium tubes and flat bars, with high-performance composite plastic and fiberglass joints.
- Backrests and armrests positioned externally to the platform to maximize footprint, resulting in an XL product.
- Cushions in ultra-soft polyurethane, removable covers, waterproof inner fabric. Contrast piping detail.
- Seat fixed to the structure using Velcro straps, allowing stability even without backrests and armrests.
- Stainless steel details.
- Specific aluminium pre-treatment, finished with thermosetting polyester powder coating.
- Table tops in porcelain stoneware.
- New rectangular table size designed to alternate with sofas in side-by-side compositions.
- Base delivered pre-assembled, while armrests and backrest must be fixed using a dedicated kit included in the packaging.
- The 88×88 cm seat offers generous space ensuring a high level of comfort, allowing relaxed seating with freedom of movement and excellent support.
- Compared to the previous version, materials such as bamboo and PVC have been removed due to maintenance concerns and low perceived product value.
